Company Overview

GD Resources LLC is a dynamic firm specializing in Business Management, Information Technology, Professional services and Staff Augmentation. As a Maryland based company, we are committed to achieving our customer’s mission with precision and excellence. Our innovative solutions, client-focused approach, and proven track record of successful projects sets us apart. We prioritize agility, flexibility, and strict adherence to regulatory standards, ensuring exceptional outcomes tailored to each client’s unique needs. This commitment makes GD Resources your trusted and dependable partner.

Past Performance

Department of Veterans Affairs

- Successfully conducted routine systems servicing, ensuring consistent safety and optimal functionality. Performed preventive repairs to minimize downtime, while strictly adhering to safety regulations.

National Oceanic and Atmospheric Administration

- Delivered expert technical support for facilities maintenance, specializing in diagnosing and repairing complex facility systems to ensure seamless operations. Providing continuous services to ensure optimal facility performance and efficiency.

NAVSEA

- Proven expertise in developing acquisition packages worth hundreds of millions for Program Offices. Our work included crafting Acquisition Plans, Strategies, Market Research, RFIs, SOWs, SOOs, QASPs, and Source Selection Plans. We delivered Technical Evaluation Reports and guided programs to meet Defense Acquisition Milestones, ensuring effective negotiations and informed, cost-efficient decisions for the U.S. Navy and the Department of Defense.

Maryland State Department of Education

- Provided critical support for service requests, IT modernization, and project initiatives related to the Child Care Administrative Tracking System (CCATS) application. These efforts improved the efficiency and statewide management of Child Care programs within the Division of Early Childhood, streamlining operations and enhancing service delivery.

Maryland Department of Labor

- Delivered Application Development services to design, build, test, and implement a reporting module for the Maryland Unemployment Insurance Program, optimizing benefits distribution across five call centers and ensuring timely, accurate payments.
