## PAST PERFORMANCE

### NAVSEA

Contributed in developing acquisition packages valued at hundreds of millions for Program Offices, Successfully crafted comprehensive Acquisition Plans, Strategies, Market Research, RFIs, SOWs, SOOs, QASPs, and Source Selection Plans. Our team has delivered detailed Technical Evaluation Reports and provided critical guidance to programs, ensuring they meet Defense Acquisition Milestones. Through our strategic support, we have facilitated effective negotiations and enabled informed, cost-efficient decision-making for the U.S. Navy and the Department of Defense.

### Maryland Department of Information Technology

Supported the initiatives of the Office of Security Management (OSM) within the Department of Information Technology (DoIT), which oversees the State's cybersecurity strategy, including security policies, awareness, and the Statewide Security Operations Center (SOC). Our team has delivered expertise in cybersecurity project planning, business requirements analysis, and system data evaluation to enhance and strengthen security initiatives across State agencies.

### NOAA

Provided expert technical support for comprehensive maintenance, focusing on diagnosing, troubleshooting, and repairing complex systems to ensure smooth, uninterrupted operations. Our services encompassed the full range of maintenance needs, including both preventative and corrective measures, to maximize system performance and minimize downtime.

### Department of Veterans Affairs

Successfully conducted routine systems servicing, ensuring consistent safety and optimal functionality. Performed preventive repairs to minimize downtime, while strictly adhering to safety regulations

### Maryland Department of Health

Provided support to the Maryland Department of Health (MDH) Office of Enterprise Technology for multiple Major IT Development Projects. Our team assists with current state assessments, workflow documentation, and business operations analysis to ensure seamless modernization efforts. We support the implementation of critical systems, including case management solutions, Electronic Health Records (EHR), and licensing platforms. By leveraging subject matter expertise, we help MDH drive best practices, streamline operations, and ensure successful project execution across multiple business areas.
